

Foam Air Filter

The filtering media consists of charcoal colored 20 PPI (cell count 20, +/-5, pores) polyether polyurethane foam supported by expanded metal mesh on both sides.

Model FFA is available in a ¼", ½" or 1" thick aluminum frame with expanded aluminum mesh supports. Aluminum metal is light weight and resists corrosion.

Model FFG is available in a ¼", ½" or 1" thick galvanized steel frame with expanded galvanized metal mesh support. Frame comes with drainage ports for thorough cleaning.

- Initial airflow resistance 0.13 in. w.g.
- U/L Classified as to Flammability Only
- 5 Year Warranty
