

Nonwoven Media Mount Adapter

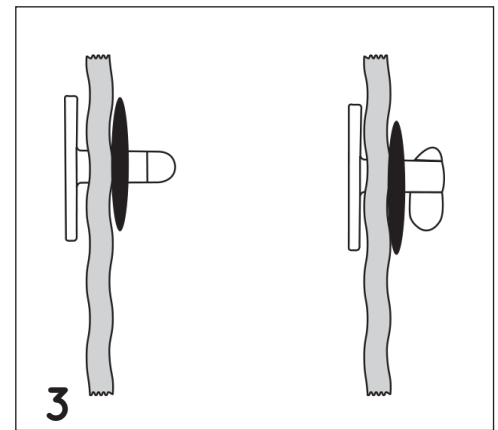

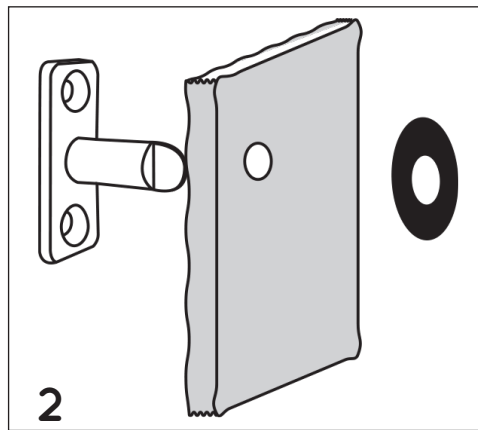

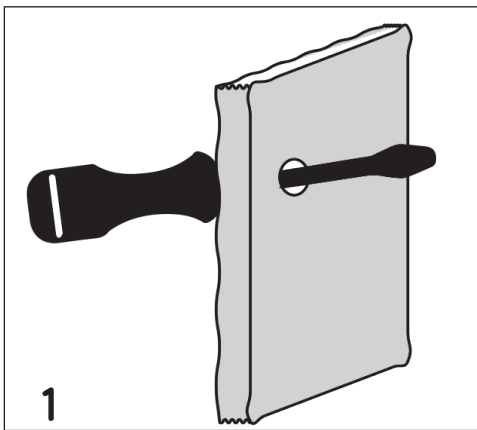

This washer kit is an add-on piece to install rigid air filter pads of nonwoven polyester media firmly in place on HVAC air intakes. The black nylon washer is UV protected and fits over single or double height Permatron mount clips. Available in 12 packs.

Simply start by adding a hole through the polyester media pad by using a screwdriver or another pointed tool, push the media down onto the open mount, and place the washer on top.

Close tab downward, locking in position. The filter media is secured in place, even against high winds.

Model# WASHER-MEDIAKIT

Attach to any rooftop HVAC equipment air intake.

Moveable tab opens and closes for secure installation and easy change out.
