

## WeatherProtect™ Intake Cover

Used during the winter months to help prevent compressor stalling by blocking cold air from reaching the coils. Installing a solid vinyl intake cover will also prevent snow and ice build-up and damage to the compressor.

The winter weather curtains are made from solid vinyl sheeting that is custom sized and finished with vinyl edging and stainless steel grommets. These winter weather curtains can be easily attached over our PreVent air intake filters during the winter months.

**MODEL # PreventWP-1000**
