

PreVent™

Computer Protection for Home and Office

Installation Instructions

Remove adhesive back and firmly press a hook strip on each side of the air intake grill edges adjoining as shown. Press one piece of filter media firmly to hook attachment strips, completely covering air intake. Save additional media for later use. Replace filter when dirty to avoid air flow restriction.

For use with CPUs and other electronics to protect against invasion of dirt and dust which may impede unit performance.

Media selected for high loft and low density to maximize air permeability and prevent airflow restriction.

Ideal for homes, offices or other hostile environments such as warehouses and processing plants.

- Clamshell Packaging
- Notched for hanging display
- 24 Kits per Box
- 6 Boxes per Case
- Private Labeling Available
- Patent Pending
